# Context

This resource contains the code used to generate and analyze data for publication MEC-24-1288.

## *Global availability of plant DNA barcodes as genomic resources to support basic and policy-relevant biodiversity research*

**Data Availability:** All data required to complete the analyses are included in Datasets S1-S3. Raw downloads from public data repositories will be archived as versions of record used in these analyses at Dryad.

# Introduction

Four code notebooks were used in the analyses for this publication.

1. [Building the BOLD dataset](#)
2. [Geographic coverage](#)
3. [Taxonomic coverage](#)
4. [Case-study in geographic coverage of site-based reference data](#)

## Chapter 1

# Building the BOLD dataset

# Building the BOLD dataset

Add rest of code notebook here and update text

## Chapter 2

# Geographic Coverage

# Geographic Coverage

Add all the code here and instructions for downloading from GBIF

## Chapter 3

# Taxonomic Coverage

# Taxonomic Coverage

Add all code here and update text.

## Chapter 4

### Case Study

# Case-study in geographic coverage

Add the code here and update text with comments.
